

The diagram illustrates a cross-section of a building's structural system, showing a central core and multiple levels of floors. The structure is composed of various elements, including columns, beams, and slabs, which are detailed with dimensions and labels. The diagram is oriented vertically, with the top of the building at the top and the bottom at the bottom. The central core is a prominent feature, surrounded by a series of floors and a base. The diagram is labeled with various dimensions and structural details, providing a comprehensive view of the building's internal structure.
